

Dr. Michael FU Kuo-Chang

Enterprise Eco-systems Expert
NOAH INITIATIVES

Dr. Michael Fu Kuo-Chang is a seasoned entrepreneur and business leader with a profound interest in agricultural, aquacultural biotech, education, and sustainability. With years of experience in entrepreneurship and business management, Dr. Fu has dedicated his career to addressing the challenges posed by climate change and its impact on sustainable human well-being.

In pursuit of his vision for a more sustainable future, Dr. Fu founded the International Association for Agricultural Sustainability (IAAS). The Association serves as a global platform, fostering collaboration among academics, researchers, industry leaders, and policymakers in the fields of agro-technology, sustainability, food technology, innovation management, and economics.

Dr. Fu is also actively involved as a mentor in accelerator programs for educational technology and agri-food industries in Taiwan and Singapore. Through his mentorship, he provides invaluable guidance to entrepreneurs, helping them to scale their businesses and achieve sustainable growth.

Dr. Fu holds a Doctor of Philosophy (Ph.D.) in Business from Singapore Management University and an Executive Master in Business Administration (EMBA) from National Taiwan University. His academic background in engineering and management has fueled his passion for leveraging technology and innovative business models to solve complex business challenges.

As a Board Member of NOAH INITIATIVES, Dr. Fu brings his extensive expertise and leadership to advance the organization's mission in promoting sustainable practices across industries.
